

LP STAKING

OASISI DEFI PROTOCOL

By providing liquidity at SunSwap, you can obtain LDA/TRX liquidity pool tokens, which can then be staked in the LP staking contract. The LP staking contract drips 2% of the staking pool daily to LDA/TRX farmers, offering an excellent opportunity to earn rewards while providing liquidity to the LDA/TRX trading pair.

COMMUNITY

The LionX ecosystem is continuously incentivized for supplying liquidity to SunSwap for the Lion Digital Alliance Token (LDA). One of the most significant advantages of the LP staking contract is that there are no fees for staking, unstaking, and withdrawing from the contract. Additionally, rolling over to the LDA staking contract is also free of fees.

POWERED

We believe that the LP staking contract will help foster the growth of the LionX ecosystem and provide an excellent opportunity for our community members to earn rewards while contributing to the liquidity of the LDA/TRX trading pair on SunSwap.

ENERGY CONSUMPTION

Stake = 60K - 100K

Unstake = 75K - 185K

Roll LDA = 105K - 195K

Withdraw = 70K- 150K
