

NFT STAKING

OASISI DEFİ PROTOCOL

This Dapp allows users to stake their NFTs and earn rewards for doing so. The rewards are in the form of "LDA" a TRC20 token, which can be claimed at any time. The longer you stake your NFTs, the more rewards you can earn.

GET STARTED

To get started, users will need to connect their wallet to the Dapp. Then, they can choose which NFTs they want to stake from their wallet. Once staked, the NFTs will be locked in the Dapp for a set period of time. During this time, users will earn rewards based on the staked NFT's rate.

EDUCATION

Users can unstake their NFTs at any time, and the rewards earned up to that point will be claimable. We believe that this NFT staking Dapp provides a unique opportunity for NFT owners to earn additional rewards by staking their assets in a secure and user-friendly way. We look forward to seeing our community engage with and benefit from this exciting new feature!

ENERGY CONSUMPTION

Approval for each NFT - (15K - 30K)

Stake - (195K - 250K)

Unstake - (200K - 250K)

Claim Rewards - (100K - 200K)

RATE OF REWARDS

The Rate of Rewards are based off the rarity of each NFT staked. Each rarity has its own rate of LDA it produces during a time period of 30 days.
